1. After you are on the "*edit image panel*", you will see various fields. Please have in mind that not all of the fields are in use. Which fields will be used depends on the specific use of the image and they need to be turned on/programmed by developer.
2. The path of the image (Original/Large);
3. The path of the thumb image;
4. By clicking on this icon you will copy the file path to your clipboard;
5. Opens the image in a new tab.

Image Presets:

You can create image presets for the media uploader that can be reused later when uploading images to direct A3 what to do. There are two types of image presets - ***Static Images*** and ***Responsive Images (to take advantage of responsive images, please read this article: <http://www.atlantis-cms.com/blog/responsive-breakpoint-sizes-config>)***. Static images are the same for all devices and are in the format of *Preset Name/[big size]/[thumbnail]* or for example *Static Header/1024x768/150x150xC* Note the XC modifier in the thumbnail part of the declaration - C stands for “crop” , it directs the system to always crop the thumbnail to that particular size, where if you omit the modifier the thumbnail will be proportionally scaled down but not cropped.

3. This entire column refers to **Media** configurations;

To add a new media file complete the following step:

1. Click on “**Add Media**” button to add a new image or pdf;

<input checked="" type="checkbox"/>	ID ^	THUMBNAIL <	NAME <	TYPE <	SIZE <	UPDATED AT <
<input type="checkbox"/>	38		1553702324-jerry-wang_desktop.jpg	image/jpeg	237.64 KB	2019-03-27 15:58:48
<input type="checkbox"/>	35		Here comes the Name	image/jpeg	770.95 KB	2019-03-26 14:59:04
						

From **“File Versions”** you can take the path(url) of the image. Depending on the **image preset** you used, you will have two paths/urls for **static preset** – “Original / Large” and “Thumbnail”. And four paths/urls for the **responsive preset** (which is our case) – “Original / Large (1920x1080)”, “Medium (1024x768)”, “Small (640x480)”, “Thumbnail (300x300)”.

The image shows two side-by-side screenshots of the Atlantis CMS interface. The left screenshot is the 'Edit Media' page for a file named '1553702324-JERRY-WANG_DESKTOP.JPG'. A red circle with the number '1' is placed over the 'File Versions' section. The right screenshot is the 'Config' page, showing the 'SYSTEM CONFIGURATION - FRAMEWORK VERSION: 2.0.0'. Red arrows point from the 'File Versions' section on the left to the 'Responsive Images' configuration on the right. A red box highlights the 'Responsive Images' section on the right, which includes a table of image presets and their dimensions.
